Career Objective

I want to build a career in a challenging position within progressive organization, employing and pertaining to utilize my experience, technical skills and creativity. I consider myself capable of doing any complex project from start to finish, using my initiative, experience and resources along with teams. I am always striving to achieve a very high standard in any set of tasks. Having worked in dynamic startup and large corporate environments with internationally located team members, I thrive in ever-shifting, multinational settings that challenge my expertise with stringent requirements. I want to forward the web, passionate to play and learn about new technology, and become a solution architect eventually. If you're looking for a quick-adapting, well-rounded software developer able to work with high-profile clients on cross-functional projects and contribute stamina, verve and grit to your team, then we should start a conversation.

Abilities

Have good problem solving and analytical skills, excellent communication skills and work well under pressure. Very quick learning capability, surfing & learning, experienced in working with big high profile teams, group project E2E development, team lead.
